PROFESSIONAL SUMMARY

As an engineering student with relevant experience in product thinking and AI applications, I focus on user-centered problem solving and translating insights into scalable product solutions. With a solid foundation in both technical and product management skills, I have built impactful products across legal-tech, productivity, and AI domains. Eager to contribute to product strategy as an Associate Product Manager

SKILLS

Product: Product Thinking, Product Lifecycle Management, User Stories, User Research, Agile Methodology, Feature Prioritization, Product Strategy, Product Roadmap, MVP Definition, Product Metrics, Scrum, Competitive Analysis

Technical: Python, JavaScript, React.js, HTML, CSS, MongoDB, REST APIs, SQL, Machine Learning, Sentiment Analysis, AI Prompt Engineering

Tools: Git, GitHub, Visual Studio Code, Figma, Notion, Canva, Jira, Trello, Google Sheets, Microsoft Excel

AI & Analytics: Predictive Analytics, Data Processing, LLMs, Data Analysis, KPI Tracking, NLP, Generative AI

PROJECTS

Nyaya AI - AI-Powered Legal Language Simplifier - Product Management, AI, UX. Mar 2026 – May 2026

- Led end-to-end product lifecycle including user research, 5-persona mapping, competitor analysis, MVP scoping and MoSCoW feature prioritization for an AI legal guidance platform.
- Architected AI workflow with NLP-based legal simplification, safety validation layer and step-by-step action checklists; defined KPIs across engagement, feature-usage and trust metrics to measure platform success.

Syra AI - AI-Voice Assistant – Product Planning, Voice Integration. Jul 2025 – Dec 2025

- Owned full product strategy and delivery for a multilingual AI voice assistant, roadmapping features and integrating 15+ smart services (Gmail, Calendar, Spotify, GitHub) to drive user engagement.
- Built analytics and testing framework tracking command usage, conversion funnels and session metrics; implemented Razorpay freemium-to-premium subscription flow to support monetization.

Focus Flow – Productivity Product Case Study - Product Thinking, UX Design. Oct 2025 – Feb 2026

- Delivered full PM case study-problem framing, persona mapping, feature prioritization, and mobile-first UX projecting 25% increase in deep work time and 20% to 30% improvement in study consistency.
- Designed task prioritization and focus workflows to enhance productivity and user engagement.

Heavenly – Property Rental Platform – Product Thinking, User Journey. Jan 2025 – Aug 2025

- Executed product strategy, feature execution, and user journey optimization for a property rental platform with secure authentication, messaging, and advanced search.
- Built scalable workflows and analytics-driven experiences to improve usability and platform interaction.

EDUCATION

Sinhgad College of Engineering, Vadgaon
B.E. Mechanical Engineering

CGPA: 7.50 | 2022-2026

PUBLICATIONS

Research Paper – Pump Failure Analysis Using ESP-32 [IRJMETs](#) | 2026

- Published research on an IoT-based predictive maintenance, enhancing efficiency and reducing downtime system for real-time pump monitoring and failure detection.
